MADE IN GERMANY

Presenting Parat!

The Company:

- Over 60 years of experience
- Around 650 employees
- 5 sites in Europe
- Certified to DIN EN ISO 9001,
- QS 9000, VDA 6.1
- Environmental standard DIN EN ISO 14001

PARAT specialises in high-performance tool cases and bags, notebook cases and transport systems for IT on the move. PARAT is also a byword for excellent quality and state-of-the-art manufacturing expertise. The company's workforce of skilled and highly motivated staff ensures exceptional flexibility during the production process. They set the standards when it comes to workmanship, easy handling and durability, qualities that are constantly being refined as part of our ongoing product development.

PARAT represents the ideal combination of innovative technology and traditional craftsmanship. PARAT products represent the best of the best in their respective segments. Tool cases and bags made by PARAT are among the highest selling products of their type in Europe.

Thanks to years of experience in turning materials, leather and plastics into tool cases, PARAT has successfully transferred this expertise to the automotive industry, the caravan sector and the agricultural and construction vehicle market. The company also draws on its experience of large-scale manufacturing for the automotive industry to shape the development of its core products.

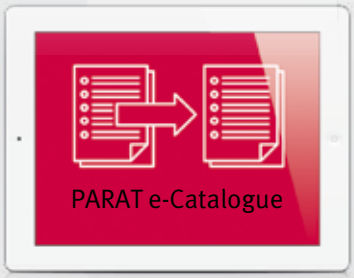
Tools for the Sales Professional

werkzeugkoffer.parat.de

PARAT is not only going in new directions with numerous innovative products. Also in the area of Online Services, there are many things that make finding the right PARAT product easier.

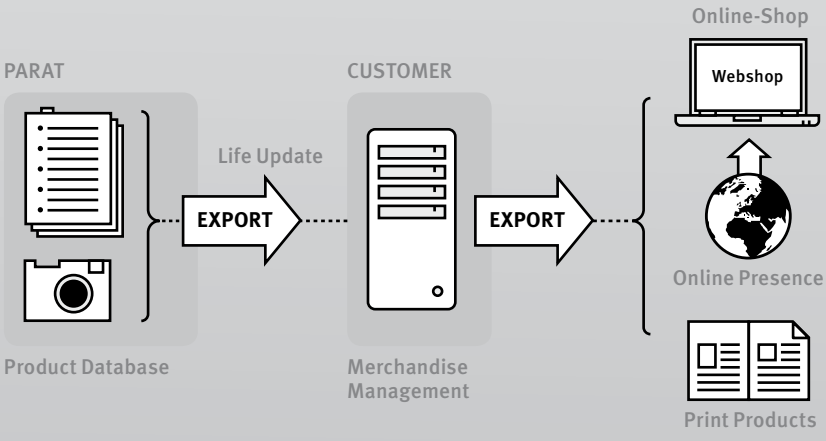


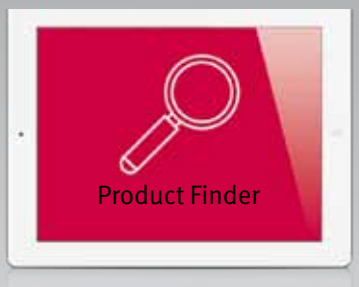
1. Our product catalogue in your merchandise management

Many retailers rely on PARAT products. Thereby, it is important nowadays to keep an eye on the product information and features etc., even in smaller companies. Ideally in the form of an electronic database, optimised for your merchandise management system and all this directly useable with the Online Shop. This requirement will now be met with the PARAT e-Catalogue. Simply let us know!

The electronic PARAT Product Catalogue:

- **Electronic Catalogue in BMEcat Format**
- **Simple integration in the merchandise management system**
- **Exportable in all conventional database formats**
- **Automatic database matching**
- **Online Shop compliant with format AGES, Ingres, Storgate 2.0**
- **Photo material “serve as you please”**



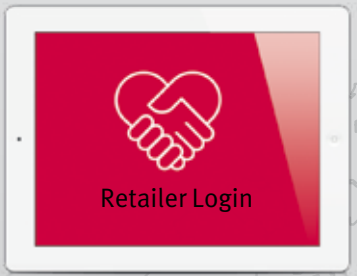


2. The way to the suitable case ...

... is easier than ever. The user is directed to a suitable case at **werkzeugkoffer.parat.de** through the clear and easy to use product search – selecting from a range of almost all product features and possible uses. If so desired, we can also show you the right local retailer.

The Product Finder

- **Options organised by use, case size and material**
- **Product Comparison**
- **With just a few clicks, find a local retailer**



3. For our Retailers ...

... we also have a lot of things prepared. We have set up numerous exclusive services in an dedicated Retailer login that provides real added value for PARAT Retailers. Prospect material will be available for individualisation, we will offer sales promotional material and exclusively supply you with information.

Retailer Login:

- **Prospect and Information Material available for individualisation**
- **Price Information**
- **Current Information on Products and Special Offers**
- **Premium Programmes**

“Having everything handy is everything!”

EVOLUTION 2.0

PARAT has reinvented the case!
More stable. Larger. Safer. The new generation of cases confidently scores with all superlatives.

A clever idea: Thanks to outstanding expertise, PARAT has recognized the advantages of the known long fiber injection **(LFI) manufacturing process** from the automobile industry. Here, the **plastic PX-ABS** is given backfoaming with **fiberglass-strengthened polyurethane**. This new production method makes the new EVOLUTION cases **extremely sturdy and impact resistant**, and they can also be transported on a plane without any problems. Because even the hard blows or rough tossing won't dent the EVOLUTION 2.0 – the hard shell remains undamaged.

reddot design award

Suggestions from Evolution users have led to numerous detail improvements so that the tool cases are more thought out and of higher quality. The new model also scores with a **storage volume of 45 or 65 litres**, so the capacity lies between that of a tool case and a tool cart – additional containers, such as a drill case, are unnecessary. However, so that the case also remains practical and handy in service, PARAT has made sure that it is light and compact.

At 970 millimetres, the extra-wide **4 part telescopic extension** made of **powder-coated aluminium** has ideal **ergonomic measurements**. Especially practical: The special **trolley-connection to the case allows rolling**, even if the case is open with extended telescopic handle.

Rubberised and ball bearing mounted rollers, as well as the wide wheel base, provide the necessary pulling comfort. The stability of the innovative material and the unique design, like the **retractable handle in the cover**, make it possible to use the case in other ways: You can also use the case as a handcart, work surface or seat.

Hinges, handle, lock, trolley and wheels are screwed on and the screws are accessible from the outside. If need be, the users can also replace parts themselves. Of course, PARAT offers a **free replacement part service** for most components.

The EVOLUTION highlights at a glance:

- 45 or 65 litres of storage volume
- extremely durable and impact resistant
- PX-ABS plastic with fiberglass reinforced polyurethane backfoaming (LFI technology)
- 4-section telescopic extension made of powder-coated aluminium with extension height of 970 mm
- unique trolley-connection to the case
- rubber-coated wheels with slide bearings
- handle can be collapsed in the cover
- screwed on and thus quite accessible hinges, handles, lock, trolley and wheels

CARGO / CLASSIC

The CARGO/CLASSIC series by PARAT can push in very nicely. The sturdy casing made of X-ABS is highly break-resistant, and thanks to double aluminium frames can handle up to 40 kg. The large rubberised rollers ensure that everything rolls as it should. But the case can also be seen from inside: The durable tool board made of Con-Pearl® and the individually fitted tool-holder system ensure that you immediately have everything handy at a glance.

Standard features at a glance:

- 4-stage telescopic handle 950 to 1,150 mm, extra-wide, powder-coated
- large, rubber-coated wheels with sliding bearings
- wide wheelbase, stable
- Durable shells, suitable for air travel made of X-ABS
- maximum load 40 kg; double aluminium frame
- hinges with ratchet and locking mechanism
- Sturdy Con-Pearl® tool boards
- individually adaptable CP-7-tool holders or stitched push-in compartments

Ratchet Hinges

The ratchet hinges are PARAT's own development for our CARGO and CLASSIC moulded cases.

Instead of bulky lid holders on the sides, the lid and bottom are attached only with durable hinges which hold the case open safely.

This feature would not be from PARAT if it didn't offer the user numerous advantages:

Unrestricted access is also possible with the case from the side.

Tools or documents can no longer get caught in the lid holder.

Rock'n Roll

If you lug around a lot but do not want to injure yourself, you'll find the PARAT-Trolley system helpful. With the telescopic handle and roller system, you can also quickly transport heavy loads to where they are needed while relieving your back of strain. The workmanship is tailored to your specific requirements. You can also assume that the system will hold up, even with daily use – we guarantee it.

The Trolley highlights at a glance:

- there are Trolley systems in combination with different case designs
- PARAT organization systems
- ball bearing mounted rollers
- ergonomically adjustable telescopic pull out handle
- durable workmanship featuring powder-coated aluminium
- can be used to transport additional boxes

Rolled, but not rattled

TOP-LINE

For those who prefers leather, there is the PARAT TOP-LINE. The extra thick, embossed leather can handle a load and is nicely light. But you still don't have to carry your tools because this case is also equipped with a professional roller system that runs securely even on the rockiest construction site. ·

Standard features at a glance:

- 4-stage telescopic handle 1,020 mm
- large, rubber-coated wheels with sliding bearings
- wide wheelbase
- no loss of space inside the cases
- small extra weight
- sturdy embossed leather
- ergonomic handles for easy carrying, with grip recesses and sturdy metal handle rails
- PARAT-variable locks
- strengthened by aluminium angles
- integrated bottom studs to protect case
- sturdy Con-Pearl® tool boards
- CP-7-tool holder system individually adaptable

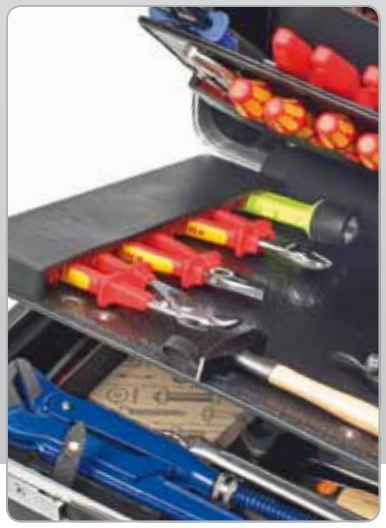
“CP-7: holds up!”

CP-7 is a flexible holding system for tools.

The system was developed and patented by PARAT (European Patent 0635338, US Patent 5515969). The system offers the user the advantage of being able to clamp the most varied tools in any spot on the system tray.

with CP-7 the tools are kept

The CP-7-system is available for tools with 11, 15 or 26 mm diameter. The holding system is in most of the PARAT cases already installed. Many PARAT tool cases with the CP-7-tool boards can be added to and individualised with numerous accessories.



Sturdy protector of order!

CARGO

Those making service calls every day must be tough. Just like the CARGO series tool cases. With break-resistant case shells made of X-ABS plastic or aluminium, they can carry just about anything. The double aluminium frame, which can bear loads up to 40 kg, protects your tools perfectly from all sides. And if something doesn't go just right, that is also no problem: The lock can only be opened when the case is lying on the correct side.

Standard features at a glance:

- sturdy X-ABS or aluminium shells, airworthy
- ergonomic handles with grip recesses
- PARAT barrel locks with automatic safety latches
- 40 kg maximum load, double aluminium inside frame
- hinges with ratchet and locking mechanism
- integrated bottom studs to protect case
- sturdy Con-Pearl® tool boards
- CP-7 tool holder system individually adaptable

Perfect protection for tools and instruments

With this service, PARAT offers you your individual and custom-fit tool safeguarding system – from the development of optimal space organization for your tools to the production of greater quantities ordered as well. Measurement devices and valuable tools are thus ideally protected and immediately accessible in the right spot. However, foam inserts are not only suited for top notch, safety-related tools or measuring devices. The secure and presentable housing in foam inserts is also an option for presenting your goods. Our tried and tested organization system (loops, CP-7 tool boards, document compartments, etc.) is also an ideal addition.

Our Classic – really classy!

CLASSIC

Some things simply can't be improved. Such as the PARAT CLASSIC line tool case. It is inherently stable, holds up to 30 kg and is made of sturdy X-ABS- plastic or aluminium. With its sturdy tool boards and lockable hinges that always keep the open cover where it belongs, you'll be well equipped for anything.

Standard features at a glance:

- sturdy X-ABS or aluminium shells, airworthy
- 30 kg maximum load; double aluminium frame
- ergonomic handles with grip recesses for easy carrying
- PARAT barrel locks
- hinges with ratchet and locking mechanism
- integrated bottom studs to protect case
- sturdy Con-Pearl® tool boards
- stitched push-in compartments

SERVICE AT PARAT

Good stays!

For a long case life. Our Service.

The brand PARAT has never stood for “disposable goods”. In case of doubt, it was always better to repair a product than to carelessly discard it. The values such as longevity and sustainability were being reflected by our company founder. It is not without reason that we time and again receive bags which have been in use for a longer period of time than the tools that it reliably protects.
Our workshop is well prepared for such cases. Here, the PARAT Service is available for the full range of products. We benefit from the experienced staff – a part of whom are qualified saddlers – in the development of cases and bags. Our own prototype construction has certainly saved us from some obstacles.

Finally, we strive for our cases and bags to be a reliable companion for our customers and that a part of the passion develops which we ourselves put into our products.

Aftercare in our repair shop:

- **case repair**
- **stitching repair**
- **original spare parts**
- **exchange service**
- **case rebuilding**
- **key and lock service**

A good item for hard work!

SILVER

With the SILVER series tool cases, even difficult jobs can be finished quickly. Because the case can hold up to 20 kg, it is easy to use with integrated locks and stable handles. Thus you'll have all tools on hand in no time.

Standard features at a glance:

- sturdy ABS shells
- 20 kg maximum load; aluminium frame
- sturdy handles
- integrated locks
- metal hinges
- lid holders
- sturdy Con-Pearl® tool boards
- stitched push-in compartments

PARACURV

The classical case of the future

Classics of the future in the scope of the PARACURV® series is offered by PARAT as a real alternative to the tool case available up to now. Forward looking users carry it today: newly defined classic design with well thought out interior. Our high-tech version leaves the traditional model behind.

Standard features at a glance:

- low tare weight, up to 60% weight reduction
- extremely sturdy and impact resistant
- 100% humidity-resistant
- sturdy Con-Pearl® tool boards
- various tool organising systems
- optimal use of the inside
- ·carrying strap for easy, hands free transportation
- continuous carrying bar or belt
- integrated bottom studs to protect case
- innovative look through modern design and exclusive material

NEW MATERIALS

Easily in form CURV®

Organised. Sturdy. Easy to have!

Highly oriented thermoplastic bands are specifically melted onto the surface and pressed in.

Are you seeking an extremely durable tool case with special features? There's nothing easier than that!

With the new series PARACURV®, we present a current innovation from PARAT: highly flexible, extremely sturdy but still light! Don't take our word for it – see for yourself. With our unusual light weights in attractive design, we have made something good even better, more flexible and durable.
Curv®: The fabric that material is made of. The developers intensively worked on the subject of surface material with this innovation and with Curv®, a revolutionary material composition was made which sets new standards.

Curv® combines the versatility of 100% thermoplastics with the high performance of fibre reinforced composites. This exclusive material, made of Propex Fabrics, possesses the high stiffness and high tensile strength which is comparable with reinforced glass fibre PP bonding. However, Curv® is much more impact resistant. This special feature along with its low density creates noticeably less weight.

CURV® at a glance

- extremely impact resistant
- very light thanks to its low density
- versatility made out of 100% thermoplastics
- high performance of fibre reinforced composites

For tough guys...!

TOP-LINE

Here professionals were at work: The TOP-LINE tool cases were developed together with professional users and therefore keep their promises. With extra thick, embossed leather, they withstand dirt, scratches and bumps and simply look good. So you'll always transport your tools the right way – just like a real pro.

Standard features at a glance:

- sturdy embossed leather
- aluminium edge reinforcement for high strength
- ergonomic handles with grip recesses and sturdy metal handle rails
- variable locks or quick-action locks

"Genuine! Leather!"

For a natural product, leather must offer a lot to be used in a PARAT tool case:

- tensile strength
- free of holes or cuts
- free of wrinkles
- abrasion and breaking resistant
- best workmanship qualities
- low residual moisture
- environmentally friendly tanning

PARAT only uses the high quality, so-called Croupon pieces in the TOP-LINE and CLASSIC products. This is the sturdiest part of the skin on the back of the bovine animal. To ensure consistent high quality, PARAT places much value on the continuous workmanship and supply chain.
Therefore, we meet the highest demands for the surface of a tool case and at the same time fulfil the relevant quality standards DIN EN ISO 3376, DIN EN ISO 3377-1 and DIN EN ISO 3377-2.

Everything in sight?

ORGANISING SYSTEMS AND TOOL HOLDERS

Everything in its place – with the flexible system solutions for tool cases from PARAT

Organising solutions from PARAT ensure that tool cases not only look good on the outside but on the inside as well. Whether it is large pliers, sensitive measuring instruments or the smallest screws which need to be transported – with the organising system from PARAT, cases are always sorted and clearly arranged.

individually adaptable CP-7-tool holders. The universal solution keeps your tools safe in every position – even upside down.

adjustable loops: for flexible and individual equipping of cases and bags.

stitched tool holder: sturdy and long-lasting. The popular classical case.

chisel holder: the irons stay sharp and the case material is ideally protected.

fixed loops: the favourable universal solution.

drawers: ideal for small parts and tools combined.

Practically ingenious. Ingeniously practical!

NEW CLASSIC

The tool case from the NEW CLASSIC series has been tried and tested for decades. The embossed leather provides the right appearance and makes a professional impression. But of course the interior qualities also count, because here the proven interior set-up of PARAT ensures that you won't waste any time looking for something.

Standard features at a glance:

- embossed leather
- some of the cases are reinforced by aluminium brackets
- sturdy handles, some with metal grip rails
- ratchet or barrel locks
- integrated bottom studs to protect case
- extremely sturdy
- good value for money
- proven interior fittings
- enhanced standing security
- higher humidity resistant

Light and a good value!

CLASSIC-LIGHT

The new tool case in the series CLASSIC-LIGHT features a good value for money as well as low tare weight and is designed for daily / industrial use. This special combination is achieved through the use of various materials. The lid and the front wall are made of extremely sturdy industrial leather, the sides are made of ABS plastic and the rear wall and bottom are out of Con-Pearl®. The cases in this series only use one centred quick action lock, although the handling is easier and faster than the case with two locks.·

Standard features at a glance:

- embossed industrial leather in combination with ABS sides and bottom / rear wall out of Con-Pearl®
- some of the cases are reinforced by aluminium brackets
- sturdy handle
- centred quick action lock
- proven interior fittings
- low tare weight
- increased humidity resistance
- excellent value for money

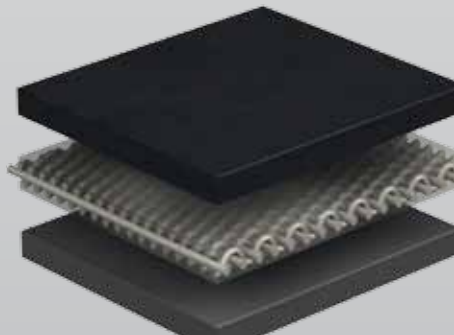
"It can withstand!"

Industrial leather

It doesn't always have to be genuine leather! High quality processed industrial leather has the advantage where it gets rough. This is because it is very tear and moisture resistant.

Industrial leather has already proven itself in the automobile industry as being durable and reasonably priced. PARAT has used industrial leather for years and values the technical features of the material. This exact quality was put to use for the new tool case series Classic-Light. Thus it is ideally suited for daily industrial use.

For the manufacturing of industrial leather, waterproof fabric and plastic is pressed or rather compressed under high heat and pressure then subsequently given a varnish. Through the material combination of industrial leather with ABS plastic and Con-Pearl®, the case has a low tare weight. is moisture resistant and offers a great value for money.



IT SYSTEM CASE FOR MOBILE CLASSROOMS AND TRAINING COURSES!

- SPACE FOR UP TO 16 TABLETS / 12 MACBOOKS / 10 LAPTOPS ✓

PARAT®

PARAGO©

- Attaché case with laptop and mobile printer mount
- integrated power distribution
- extremely robust shell

for Canon iP100

+ HP Officejet 100

The PARAGO system case is a **sturdy, hard-shell attaché case in PARAT design and quality**.
Specially designed for **technical field service staff, it is suitable for Canon or Hewlett-Packard portable printers and any type of laptop** with a screen size of max. 39.6 cm **(15.6")**.
Great **attention to detail** and ample **storage space** for accessories makes it a convenient option for a wide range of applications.
A **central power supply** and **handy pockets for documents** and **cables** make the PARAGO from PARAT the **perfect portable office solution**.

Protect your valuables!

PARAPRO

The PARAPRO is the strongbox among the cases. The shells consist of thick walled polypropylene and are nearly indestructible. In addition, they are 100% water-, dust- and air-proof. No matter what you are transporting in it, you can be sure that it will arrive safely.

Standard features at a glance:

- 100% water-, dust- and air-proof
- stackable
- nearly indestructible
- meets military standards
- large sizes available optionally with wheels
- integrated pressure compensating valve
- fixture for a padlock
- address / name label
- comes empty or with pre-cut foam inlays

PARAPRO case 6330

„Heavy Duty!“

Defence standard 81-41 Level J
STANAG 4280

STANAG means Standardisation Agreement and defines processes, procedures, terms, and conditions for common military or technical procedures or equipment between the NATO member countries. This standardisation guarantees the sturdiness of military equipment, even in the most extreme situations. Our PARAPRO series follows these military specifications.·

PARAT Guarantee!

In the unlikely event that at any time one of our cases breaks, we will offer you a free exchange.

PARAPRO

Showing strength!

For a tough load in every surrounding

Areas of application include:

- military
- emergency medical services
- industry
- offshore
- sea travel
- outdoor
- photography
- broadcasting
- police

The cases consist of thick-walled polypropylene, are virtually indestructible and thus more stable than the standard cases that can already be taken on a flight. Moreover, all special cases are 100% water-, air- and dust-proof and thus protect the contents from all external influences.
The cases are indestructible at temperatures between -33 and +90 °C. If low or excess pressure arises in the cases due to longer storage or temperature fluctuations, this can be corrected at any time through a valve.

Standards:

- dust-proof according to IP67
- water proof
- defence standard 81-41 Level J STANAG 4280 (edition 2)
- compliance with EU Guideline 2002/95/EC
- stackable
- convenient transport with ball bearing mounted wheels

Doesn't fit – doesn't exist!

PARAPRO

The PARAPRO tool cases are made for the toughest tasks – because they even meet NATO's military standards. No matter what you use it for, the shell of these cases will not get cracked.
The walls are made of polypropylene and are virtually indestructible. They will withstand extreme temperature fluctuations, are air-, water-, and dust-proof and tolerate even severe pressure loads or falls. Are you tough enough for these cases?

EU

Standard features at a glance:

- air-, water- and dust proof according to IP 67
- sturdy telescopic handle system mounted to the bottom of the case, integrated impact rollers
- sturdy indestructible case shells made of polypropylene
- meets Nato-military standards
- integrated pressure compensating valve
- smooth-running snap-in latch, with a fixture for padlock
- address / name label
- individually adaptable tool holder with either stitched or CP-7-tool-board

The elegant eye-catcher TronX White and Attache White

The WhiteLine shows that PARAT, time and again, takes an exceptional path. The white glossy optic ensures a perfect appearance for the user. At the same time, the product shows, through its quality “typical PARAT”. Your documents, notebooks and tablet PCs are safely stored in the Classical Attache and TronX. Of course, PARAT did not forgo the use of convenience such as the lockable locks, the PARAT wheels and telescopic system (TronX) or the ergonomic handle recessed in the cover. If you are open to unusual entrances: The WhiteLine is most certainly the right choice.

“White along all lines.”

The model Attache and TronX are ideally equipped for presentations and customer visits.

PARAT LIGHTING

Professional Safety Lamps from PARAT

PARALUX® CERTIFIED LIGHTING and PARAT X-TREME® PROFESSIONAL LIGHTING – two light series, one goal: sturdy, functional and manageable lights according to modern standards and at the same time, the best possible luminosity. The PARALUX® lights are a real all-rounder with innovative technical features, combined with Ex-Protection following ATEX and IECx (gas and dust), allowing use also near fire, gas or high heat areas.

If no Ex-Protection is necessary, then try the brand new Parat X-treme® Professional Lighting product line. Because even here you shouldn't have to do without water, dust and air-proof as well as impact resistance. Proven quality from the Ex-Protection programme which delights with even more luminosity.

PARALUX®
CERTIFIED
LIGHTING

PARAT X-TREME®
PROFESSIONAL
LIGHTING

Certified safety or maximum power?

The brand new lights from the product line PARAT x-treme® PROFESSIONAL LIGHTING offers maximum power with even more luminosity. Even without the Ex-Protection, a professional use of the lights is also possible here. The PARALUX® CERTIFIED LIGHTING line for the security sector also provides a higher light performance and can be used near fire, gas or high heat areas.

It is your choice: certified safety or maximum power.

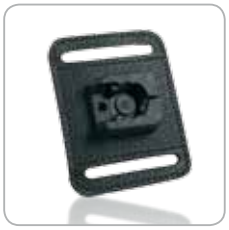
LED High Performance Lamp PX1



Belt mount PARASNAP© BASE

NEW

The Helmet Mount Innovation

PARASNAP© – in one movement, the Parat Lamp is where you need it. Whether on a helmet or belt. Safe, flexible and quick.

The revolutionary helmet mount PARASNAP©. Uniquely appealing! Simply functional! An unbeatable combination of magnetic connection and mechanical locking.

The attaching system consisting of a base (helmet mount or belt clip) and the SNAP-IN allows for the flexible adjustment of the beam through a fine hinge lock. It is possible to quickly mount and remove the holder when the helmet is on with only one hand.

Component 1:
The SNAP-IN is clipped onto the hand lamp from PARAT.

Component 2:
The base is mounted onto the helmet.

Further information and videos can be found on our PARAT LIGHT Facebook page.

PARASNAP© is compatible with: PX0, PX1 (LED) and X1 or with PX2 (LED) and X2.

Compact Power for Professionals

Brand new from PARAT: for use in industry and the craft sector, we now have a professional solution with more light without restrictions of Ex-Protection: The new, luminous PARAT X-TREME® PROFESSIONAL LIGHTING Series which is based on the known PX range and offers lamps with up to 170 Lumen*.

A further new feature was worked into the X1. With the light intensity switch, a glare-free illumination is possible even at close range. The user can conveniently turn the rear switch on or off between 100 and 15 per cent light intensity in one easy movement. A useful side-effect: the battery use is reduced.

The new X-Treme® lamps fulfil the usual PARAT quality standards – sturdy, water, air and dust proof as well as impact resistant.

The X-Treme® Features at a glance:

- 100% waterproof, airtight and dustproof
- Light intensity up to 170 Lumen*
- Lighting range up to 200 m
- compatible with almost every helmet mount (X1)
- bulb: LED
- material: polycarbonate – non-conductive plastic
- rear switch for one handed operation
- light intensity switch (100% / 15%) using rear switch (X1)
- Lamp protection with rubberized lamp head

PARAT X-TREME® PROFESSIONAL LIGHTING

* information from the LED manufacturer referring to the bulb.

LED High Performance Lamp X2 NEW

6 . 901 . 152 . 150

compact construction with high performance

- 100 % water proof
- made from non-conductive plastic with clip for attaching
- compatible with **PARASNAP©**
- rubberized rear switch for one handed operation
- rubberized lamp head
- supplied in blister packaging, batteries included
- individually printable on request

bulb	1W CREE LED
light flux	approx. 45 Lumen*
lighting range	approx. 50 m
dimensions	approx. 143 x 19 mm
weight	20 g without, 40 g with batteries
running time	approx. 4 hours
batteries	2 x AAA / Micro / 1.5 V each
material	PC (polycarbonate)
specials

Helmet mount PARASNAP© BASE Left

NEW

6 . 902 . 040 . 151

Helmet mount, base for wearing on the left

base holder left for PX1, X1, PX2 and X2

- Required is SNAP-IN1 (PX0, PX1, X1) or SNAP-IN2 (PX2, X2)
- mountable on almost every DIN-helmet* from the brands DRÄGER, SCHUBERTH, ROSENBAUER, MSA, CASCO etc.

material	glass fibre reinforced polyamide and VA plate, 2 mm 2 round head screws M5 x 8 mm
dimensions	approx. 35 x 60 mm
weight	approx. 65 g

Light Holder PARASNAP© SNAP-IN 1

NEW

6 . 902 . 042 . 151

Mounting clip (only) for the PARAT lights PX0, PX1 and X1

- magnetic counterpart to PARASNAP© BASE left, right or belt mount
- the holder is simply clicked onto the side of the light body

material	glass fibre reinforced polyamide
dimensions	approx. 50 x 40 mm
weight	approx. 11 g

Belt Mount PARASNAP© BASE

NEW

6 . 902 . 044 . 151

Belt Mount made from genuine leather with PARASNAP© base, natural

- Additionally needed is SNAP-IN1 (PX0, PX1, X1) or SNAP-IN2 (PX2, X2)
- belt loop for belt width up to 55 mm

material	genuine leather and glass fibre reinforced polyamide
dimensions	approx. 90 x 70 mm
weight	approx. 35 g

Helmet Mount PARASNAP© BASE Right

NEW

6 . 902 . 041 . 151

Helmet mount, base for wearing on the right

base holder right for PX1, X1, PX2 and X2

- Required is SNAP-IN1 (PX0, PX1, X1) or SNAP-IN2 (PX2, X2)
- mountable on almost every DIN-helmet* from the brands DRÄGER, SCHUBERTH, ROSENBAUER, MSA, CASCO etc.

material	glass fibre reinforced polyamide and VA plate, 2 mm 2 round head screws M5 x 8 mm
dimensions	approx. 35 x 60 mm
weight	approx. 65 g

Light Holder PARASNAP© SNAP-IN 2

NEW

6 . 902 . 043 . 151

Mounting clip (only) for the PARAT lights PX2 and X2

- magnetic counterpart to PARASNAP© BASE left, right or belt mount
- the holder is simply clicked onto the side of the light body

material	glass fibre reinforced polyamide
dimensions	approx. 35 x 30 mm
weight	approx. 10 g

Our patented, magnetic system provides a quick and easy mounting of the light without having to take off the helmet.
The holder can only be used together with the light mount PARASNAP© SNAP-IN.

* compatible with most every national and international helmet according to DIN EN 443. Likewise, the use of PARAT products should take into account the country specific regulations or authority guidelines.
